

**The Danish Soil Science Society (DFJ) student day**  
**Friday December 1<sup>st</sup> 2017**  
**Thorvaldsensvej 40, 1871 Frederiksberg C**  
**Rooms R645-646, 6<sup>th</sup> floor**

**DFJ invites to a half-day seminar for BSc, MSc and Ph.D. students with interest in soil.**

**Program:**

13.00 – 13.10 Welcome address and tribute to the World soil day (December 5.)

13.10 – 14.00

**Line Vinther Hansen (KU-PLEN):** Improving water retention of coarse sandy subsoil with amendment of bottom ash from the combustion of straw

**Jeanne Vuaille (KU-PLEN):** Urban and animal waste materials application to agricultural soils: occurrence of human and veterinary treatment products and effect on soil biodiversity

**Bingru Wang (KU-IGN):** The changes of soil microbial C/N/P stoichiometry and phosphatase activity along afforestation chronosequences in oak, Norway spruce and beech

14.15-15.00:

**Maja Holbak (KU, PLEN):** Hydraulic properties of calcareous subsoil

**Pablo Denti (KU, PLEN):** Non-targeted fingerprinting analysis of soil (GANDALF)

**Ann-Sofie Gimlinge (KU, PLEN):** A short assessment of the applicability of heavy metal soil remediation techniques used in Denmark, on Chinese soil

15.15-16.00:

Invited speakers: Associate senior lecturer **Edith Hammer** and Post-doc **Kristin Aleklett**, Microbial Ecology, Lund University. Soil on a chip – how to use microfluidics to study microbial ecology in soil systems. Read about Edith and Kristin's research [here](#).

Participation is free and DFJ provides coffee and cake in-between sessions. Registration and questions can be sent to [gry@plen.ku.dk](mailto:gry@plen.ku.dk)

On behalf of DFJ,

Karina Knudsmark Sjøholm and Gry Lyngsie
